## *The World's Most Eminent and Successful*

## *Breeders of Outstanding Hybrids*

1959 FALL OFFERING  
SEEDLINGS & ESTABLISHED PROPAGATIONS

#### REGARDING SEEDLINGS:

"I have closely followed Miss Low's hybridizing for many years and consider her to be one of the world's outstanding hybridists." Considering that the source of this remark is a nationally known hybridist in his own right, with many years of experience to his credit, his comment is unquestionably highly complimentary.

These days literally everybody is making seedlings. Some are making a sincere and studied attempt to produce better quality blooms, according to today's standards and requirements, with years of experience to aid them. Others are crossing one good flower on another good flower, perhaps an awarded flower on another awarded flower, hoping that good luck will favor them. Others are just putting on seedpods, regardless.

It takes no more time or effort to grow Seedlings of good expectancy than it does to grow those of indiscriminate expectancy and while no one has yet learned the secret of producing orchid seed which will in turn produce 100% exhibition grade plants, certainly seedlings made with planned expectancy, backed by years of hybridizing experience, can definitely be relied upon to produce the better results.

The Low family have been identified with orchids thru four generation and the past two decades Stuart Low hybridizing has been in the capable hands of Miss W. Eileen Low, highly regarded throughout the orchid world for her work and successful accomplishments with orchids.

This is what we mean when we say "STUART LOW THE WORLD'S MOST EMINENT AND SUCCESSFUL BREEDERS OF OUTSTANDING ORCHIDS".

In support of this contention we point to the partial list of Stuart Low successful *Cattleya* hybrids over recent years, which is truly impressive:

<i>Blc. Apparition</i>	<i>Lc. Jervis Bay</i>	<i>Lc. Olga</i>
<i>Lc. Castle of Mey</i>	<i>Lc. Jevington</i>	<i>Lc. Penmarth</i>
<i>Lc. Dewsbury</i>	<i>Blc. Morning Sun</i>	<i>Lc. Sam W. Soysa</i>
<i>Lc. Ennerdale</i>	<i>Blc. Normans Bay</i>	<i>Lc. Snowdrift</i>
<i>Bc. Gilbert Fuller</i>	<i>Lc. Mullion</i>	<i>Lc. Walter Lee Orth</i>
<i>Blc. Herons Ghyll</i>	<i>Lc. Nelson</i>	<i>Lc. Wheal Rose alba</i>

Obviously it is with pride that we offer the following list of

# ESTABLISHED PROPAGATIONS

Established propagations, from proven bloomers, provide a thrifty way to improve the quality of any collection. Given two to three years of good culture they will be blooming size plants of exhibition quality, worth several times their cost. Number and size of bulbs and the quality of the flowers, determine the price. Where two propagations of the same size are listed, at different prices, the higher priced piece will definitely produce higher quality flowers. Mainly we have but one piece of each item listed and suggest you indicate a second choice when ordering.
